## Save money and time with a rebuilt Nordson adhesive system.

### Repair your equipment or buy a reconstructed like new equipment and save money and time

Factory-trained Meltco technical representatives can help you achieve top system performance with priority service that meets original factory specifications. Or rebuild your equipment with genuine Nordson spare parts.

#### Easy and efficient:

1. Upgrade or configurate your existing adhesive system
2. Get like-new, reconstructed equipment for less money
3. Keep your existing equipment, which will have it's best performance

#### You have our commitment to quality:

- Complete warranty, same as new Nordson equipment.
- High quality genuine Nordson spare parts.
- ARebuild by trained Meltco technicians.
- Correction and electrical connections based on standard factory specifications.
- Instant service from Meltco engineers

#### Keep the production line working as we rebuild the system

The components we will service and replace are all up to your discretion to ensure we efficiently optimize your adhesive systems. Furthermore you don't need to stop your production line while those works take place.

To date we repair and have in stock:

- Melter
- Boards
- Modules
- Nozzles
- Pumps

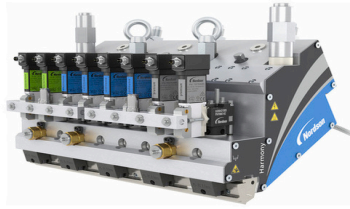

Products are constantly being added to the program. Get in contact with us and ask us about your equipment.

## Save money with Nordson factory rebuilt equipment

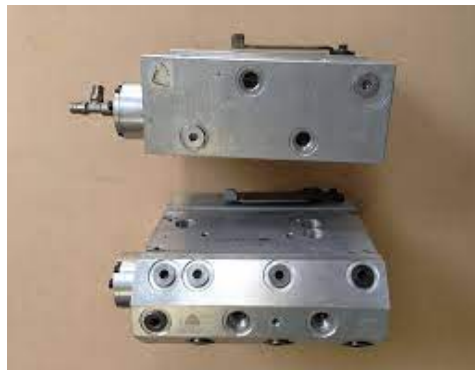

### Why choose reconstructed equipment?

- Pay less for reliable and durable Nordson equipment
- Reduce unwanted downtime and maintenance typically required on older systems
- You know that all mechanical, pneumatic, hydraulic and electronic systems are thoroughly tested for functionality
- You are assured that all repair work is done to factory quality specifications
- Protect your Nordson systems and UL intake system by using genuine Nordson parts.

### Does my equipment qualify for rebuilt

Nordson remanufactures equipment in nearly every industry and market it serves. Call us for any repair requests for any equipment and you will receive a prompt and easy to understand quotation.
