Torit®

FS PULSE JET BAGHOUSE DUST COLLECTORS AND BIN VENTS

ULTRA-WEB®
High Efficiency Fine Fiber Filters Built to Last

DURA-LIFE™
Twice The Life Filter Bags

121FS8 Pulse Jet Baghouse Dust Collector
with integrated fan, silencer and dumpster discharge

25FS8 Bin Vent
with integrated fan

Economical solutions for dust collection and bin venting applications.

- Side bag filter removal allows for installation in low headroom applications
- All-welded construction provides increased durability and air/water integrity
- Integral fan option up to 75 hp helps to reduce space requirements
- Collectors with up to 225 bag filters require only one dirty air inlet, one clean air outlet, and one hopper, resulting in reduced ducting and hopper outlet costs

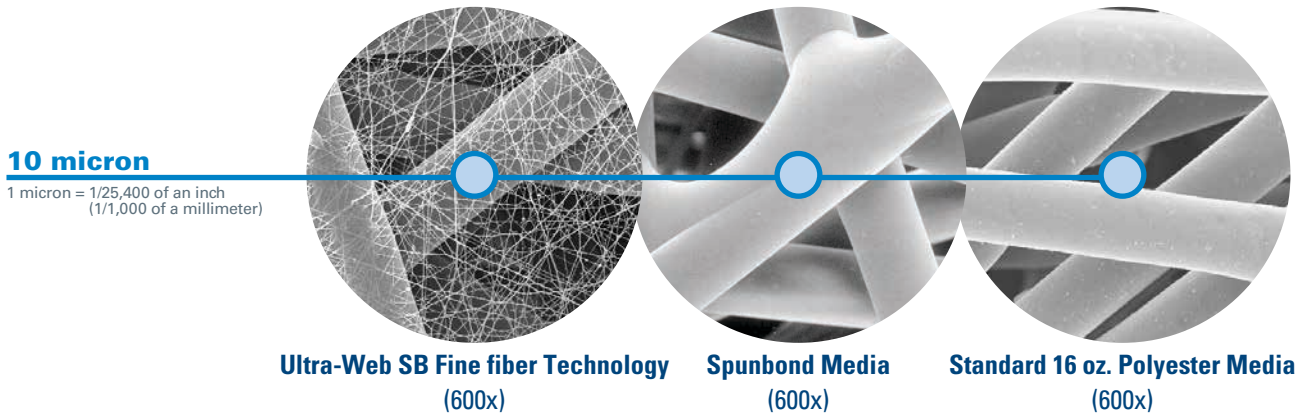

TWO BREAKTHROUGH FILTER OPTIONS FOR YOUR FS BAGHOUSE

DURA-LIFE FILTER BAGS PROVIDE TWICE THE LIFE OVER STANDARD 16 OZ POLYESTER BAGS

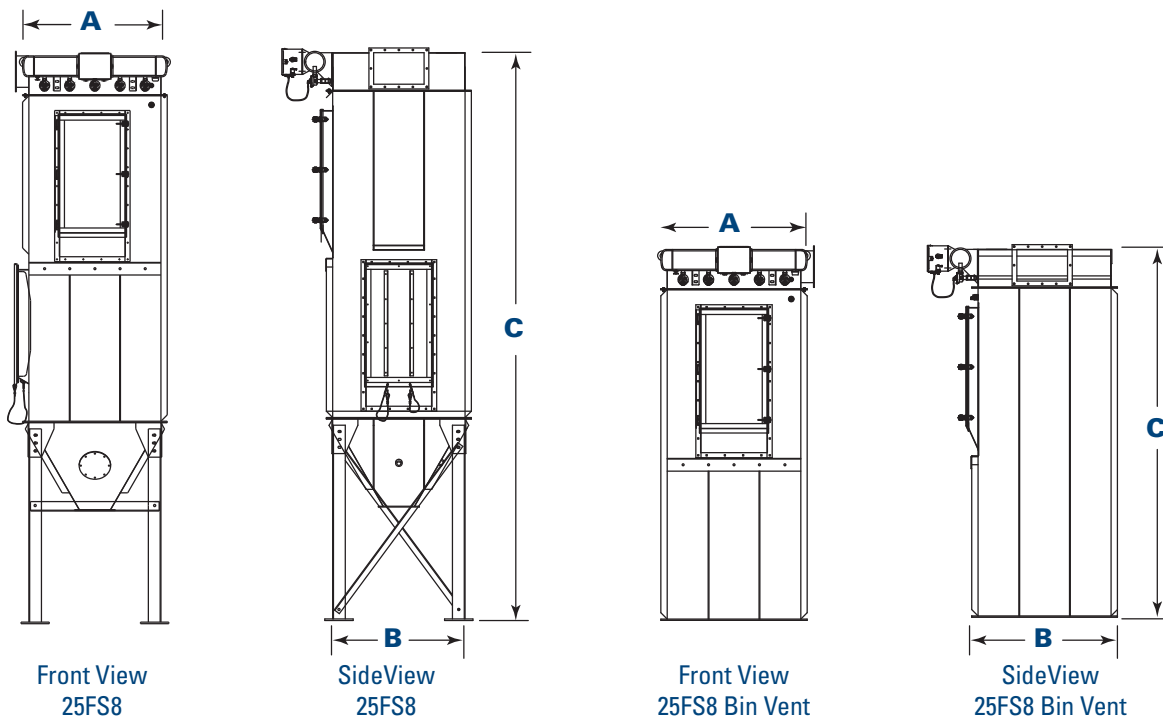

Traditional 16 oz polyester bags are produced via a needling process that creates larger pores where dust can embed into the fabric, inhibiting cleaning and reducing bag life. Dura-Life bags are engineered with a unique hydroentanglement process that uses water jets to blend the fibers. This process creates a felt with smaller pores which keeps more dust on the surface of the filter resulting in better pulse cleaning and longer bag life.

PLEATED BAGS WITH ULTRA-WEB SB PROVIDE LONGER LIFE AND REDUCED EMISSIONS

For more than two decades, Donaldson Torit has advanced the proven Ultra-Web fine fiber technology. Ultra-Web provides a very fine, continuous fiber of 0.2-0.3 micron in diameter to form a web-like net that traps dust on the surface of the media. Combining Ultra-Web technology with a sturdy spunbond polyester substrate, Ultra-Web SB pleated bag filters provide longer life, reduced downtime and reduced emissions.
